

2021 Q4 Report: Methamphetamine-related 911 EMS responses per 10k population, October 2021 – December 2021

Page 1

State	Count	Rate per 10k	Percent coverage
Colorado	3,512	6.17	83.9 %
Kentucky	1,400	3.13	96.0 %
California	10,681	2.70	47.6 %
Georgia	1,928	1.83	93.4 %
Maine	196	1.46	98.2 %
Washington	1,091	1.45	15.3 %
Arizona	865	1.21	21.7 %
Michigan	1,045	1.05	95.6 %
Florida	2,011	0.94	88.9 %
Illinois	677	0.53	78.6 %
New York	825	0.42	75.8 %
Texas	766	0.27	14.7 %
Missouri	149	0.24	4.9 %
Washington, DC	–	–	0.0 %
Pennsylvania	–	–	0.0 %

Report summary

In Quarter 4 (Q4) of 2021, 24,803 methamphetamine-related 911 responses were recorded by biospatial.io for NDEWS Sentinel Sites. Of those 911 responses, a majority of persons were white (51%), and male (68%). Within our Sentinel Site Network, Colorado had the highest rate of responses with 6.17 responses per 10k residents (3,512 total responses), followed by Kentucky with 3.13 per 10k residents (1,400 total responses) and California with 2.70 responses per 10k (10,681 total responses).

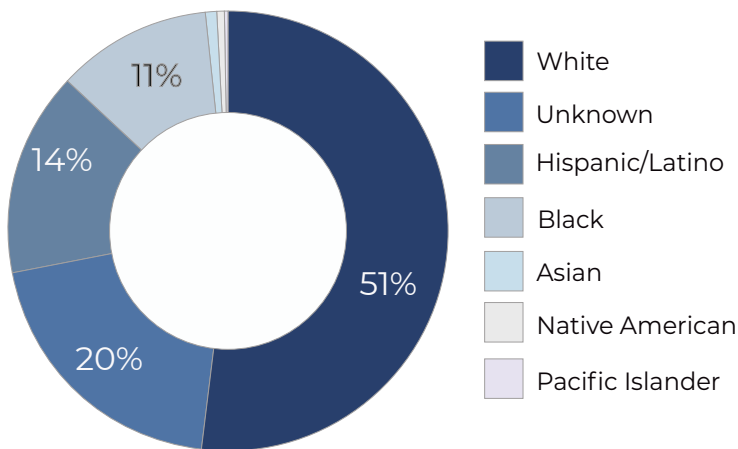

Methamphetamine-related 911 responses are calls involving methamphetamine, based on the EMS narrative. Data are available for 66% of all EMS responses in the US, with full coverage in 24 states; 75% of the data reported within 24 hours of event.
