

Alert from the NDEWS Web Monitoring Team: Online mentions of Flubromazepam

What was found? A trend of increased discussion for the drug Flubromazepam has emerged on Reddit in Fall 2021 and early 2022.

To what does Flubromazepam refer? Flubromazepam is a benzodiazepine derivative drug commonly sold in NPS markets.

How is it being discussed? Commenters describe the long duration of Flubromazepam's effects. Flubromazepam is part of a larger trend of designer benzodiazepines sold and discussed online in recent years. While the slang term "flubro" is associated with Flubromazepam, it more commonly refers to similar drugs Flubromazolam and Flubrotizolam. Due to this ambiguity, "flubro" mentions were excluded from Flubromazepam counts.

Drug Terms: Flubromazepam.
