N-DEWS | NATIONAL DRUG EARLY WARNING SYSTEM

Opioid overdose-related 911 EMS responses per 10k population, June 20, 2022 – July 20, 2022

Page 1

Top ten states by rate per 10k

State	Rate per 10k	Count	Percent coverage
Kentucky	2.18	935	91.9 %
Maine	2.12	277	100.0 %
South Carolina	1.73	878	90.9 %
Tennessee	1.72	1,134	77.5 %
Florida	1.60	3,382	89.9 %
Rhode Island	1.50	155	94.6 %
New Mexico	1.34	1,618	75.9 %
Illinois	1.32	271	89.4 %
Michigan	1.31	1,266	90.5 %
Alabama	1.31	620	81.8 %

Report summary

From June 20, 2022 to July 20, 2022, opioid-related 911 responses were reported in 1,188 incident counties in 43 states. Of those 911 responses, a majority of persons were white (52%), and male (68%). Within states with at least 70% coverage during the reporting period, Kentucky had the highest rate of responses with 2.18 responses per 10k residents, followed by Maine with 2.12 per 10k residents, and South Carolina with 1.73 per 10k residents.

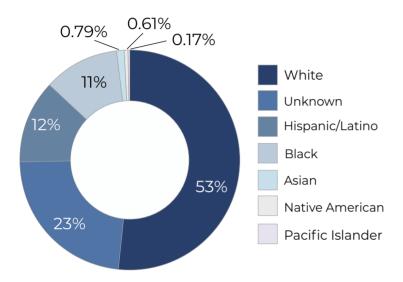

Opioid-related 911 responses are calls involving opioids, based on the EMS narrative. Data are available for 66% of all EMS responses in the US, with full coverage in 24 states; 75% of the data reported within 24 hours of event. **Source: biospatial.io, 2022.** Data are suppressed when there are less than 10 events. Data extracted 7/20/2022. NDEWS is funded by the National institute on Drug Abuse to the University of Florida (PI: Cottler, Co-Is: Goldberger, Nixon, Striley), New York University (Co-I: Palamar), and Florida Alantic University (Co-I: Barenholtz).
