

NDEWS Special Report Frequency of counties ranking among the top five counties for nonfatal overdoses July 9 - September 30, 2024

This week, NDEWS highlights the frequency of counties ranking among the top five counties for nonfatal overdoses from any drug per 10,000 population over the 12-week period. The bar chart below shows the frequency of each county ranking in the top five for highest rates of nonfatal overdoses from July 9 to September 30, 2024. The map displays the 28 states/districts with statewide coverage that were included. There were a total of 11 counties that were in the top five two or more times; a dot was placed on each as shown in the chart below. District of Columbia had the highest frequency, ranking in the top five highest 12 out of 12 weeks.

Frequency of counties ranking among the top five counties by rate of nonfatal overdoses per 10,000 population

County, state/district, and frequency of ranking in the top five

County	State/ District	Frequency of ranking in the top five	County	State/ District	Frequency of ranking in the top five
District of Columbia	DC	12	Lee	KY	3
Swain	NC	11	Lake	CO	2
Amador	CA	6	Philadelphia	PA	2
Del Norte	CA	6	Hopewell City	VA	2
Johnson	IL	5	Richmond City	VA	2
Atchison	KS	4			

All dispatch types above follow the guidelines set by the National Emergency Medical Services Information System (NEMSIS). Data is limited to 28 US states/districts with statewide partnerships with biospatial.io: Alabama, Alaska, Arkansas, California, Colorado, District of Columbia, Florida, Georgia, Idaho, Illinois, Kansas, Kentucky, Maine, Michigan, Minnesota, Mississippi, Montana, New Mexico, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Virginia, Wisconsin, and Wyoming.

Nonfatal overdose-related dispatches are based on the Rhode Island Department of Health definition for detecting incidents involving nonfatal drug overdoses.
